Subject: Mackenzie Gas project input

Hi Mrs. Pacholek,

I'm writing to say that I am opposed to the development of the Mackenzie Gas Pipeline Project. I believe this project will be detrimental to a watershed system that is very important for local indigenous communities as well as animal and plant communities. I am concerned with the pipeline's implications for further oilsands development in Alberta and the resulting greenhouse gas emissions' effect on our planet's climate.

Thanks
Owen Gray
